New Shingle Roof Performance Requirements

Category	Certified To Achieve	GoNano NuRoof Revive™ & GoNano NuRoof Fortify™ (Installed on 15 yr. old roof)	Typical Shingle (At time of installation)
Impact Resistance	UL 2218	EXCEED (Class 3+)	PASS (Class 2)
Resist High Wind	ASTM D3161	EXCEED (110 mph)	PASS (60 mph)
Moisture Barrier	Scientifically Proven	EXCEED	PASS
Hydrophobic	Scientifically Proven	EXCEED	No
Moss & Algae Purging	Scientifically Proven	EXCEED	No
Resists Uplift Pressure	ASTM D7158	PASS	PASS
Fire Resistance	ASTM E108	PASS	PASS
UV Resistance	ASTM-D4329	PASS	PASS
Tear Strength	ASTM D3462	PASS	PASS
Wind Uplift Resistance	ASTM-D7158	PASS	PASS

This installation is a spray on top of an existing roof system which at the time of install achieved all code requirements. This treatment penetrates into the aged shingle resulting in an embedded protection system. This application restores the shingle performance characteristics to equal or better. In some cases, exceeding the requirements from when it was originally manufactured.

Extraordinary Results

Trusted Performance (2025)

Over 50,000 homeowners benefiting from superior property protection with this patented molecular nanotechnology.

Save Thousands

Typically 75% lower cost versus a roof tear off and replacement. That is because GoNano NuRoof Fortify™ & GoNano NuRoof Revive™ act like a protective roof shield when applied to your existing roof system. Both enhancing and strengthening the asphalt shingles from the inside (below the surface).

Increased Value & Faster Home Resale

Better appearance and superior defense, combined with an extraordinary product defect limited warranty that is transferable to the new homeowner.

Prevents Ugly Roof Discoloration & Growth

Keeps out the moisture required for mold and algae growth. Any existing discoloration will likely be eliminated within 15 weeks and the roof's original color will be restored.

Special Note

Your shingles also now has these performance advantages

Reduce Granule Loss

significantly improves granule adhesion

PROTECTS ASPHALT

Reduce Algae & Moss

overtime, literally suffocates algae & moss

MORE ATTRACTIVE

Impact Resistance

helps prevent most insurance claims due to hail storms

BETTER THAN NEW

Official Endorsement Notice

This document is the sole authorized Submittal Specification Sheet issued and endorsed by GoNano™. No other submittal sheet — whether bearing the GoNano™ name, logo, trademarks, or otherwise purporting to represent GoNano™ — is recognized, authorized, or endorsed by GoNano™, including but not limited to any submittal documentation independently created, modified, or co-branded by a GoNano™ Certified Contractor or any third party. Any such unauthorized document submitted to an insurance provider, underwriter, or other party shall not be deemed to carry the endorsement, representation, or warranty of GoNano™. GoNano™ reserves the right to disavow and disclaim any liability arising from the use or submission of non-authorized documentation. Insurance providers and homeowners are encouraged to verify the authenticity of any GoNano™ submittal sheet by contacting GoNano™ directly.

We have made substantial financial investments in third-party testing and scientific validation, including testing with the Insurance Institute for Business & Home Safety (IBHS) to evaluate granular loss, tear strength, and impact resistance, as well as FTIR analysis conducted by Centre national en électrochimie et en technologies environnementales (CNETE), demonstrating significant improvements in anti-aging performance and resistance to fatigue cracking.

\$1M Invested in Testing

ASTM D3161

Great Winds Standards Testing: Validates performance under extreme wind conditions.

UL 790

Fire Proof Standards Testing: Proves that GoNano doesn't adversely effect fire resistance.

Green Center IMPACT Chemistry

Demonstrates that coatings of GoNano product reduce impact penetration depth.

UL 2218

Impact Resistance Testing: Demonstrates superior impact resistance to hail damage.
